

Central UK Chapter

Introduction to UNIX and Linux

4th December 2008 at Crown Plaza NEC

Organisations are increasing utilising UNIX and Linux to implement the corporate server environments. Auditors need the expertise in this operating environment to ensure successful outcomes.

This one day workshop will be an introduction to UNIX / Linux and assumes no knowledge of this operating environment. The course will be hands on with numerous examples and group discussions. This workshop is specifically aimed at any IT manager, IT Auditor or consultant. The course attracts 7 CPE hours.

The course leader is **Phil Colledge**, the author of *Advanced Programmers Guide to AIX* and a consultant with 20+ years experience of the implementation, management and audit of UNIX / Linux and other operating environments.

The Introductory course objectives will cover:-

- Understanding an operating system
- UNIX / Linux features
- Introduction to UNIX / Linux commands
- Introduction UNIX / Linux Security
- Case Studies and examples
- Practical hands on with Linux
- Audit Check list
- Edit files
- Finding files
- Managing files
- Managing users
- Concept of Administration (root user)

The cost of the Introduction to UNIX and Linux course is :

£295 + VAT for ISACA members

£365 + VAT for non-members

The costs includes lunch and refreshments and full delegate media pack. The course is limited to a maximum of 10 delegates.

Overnight accommodation is available at extra cost, but we have secured at special discounted rate.
