

To be held at 17:30 on **Thursday 22 October 2009**
at the offices of: **KPMG, 100 Temple Street, Bristol BS1 6AG**

For directions see: http://www.isaca-central.org.uk/images/KPMG_Bristol.pdf

A spotlight on ISACA's new framework, Risk-IT

Guest Speaker: Steven Babb, KPMG

IT risk is receiving growing attention from executive management, risk managers, regulators etc. The COBIT® Framework provides a generally accepted control framework (amongst many other things), but it does not provide the full detail required for comprehensive risk management.

In this session, you will find out about ITGI's newest initiative: a new IT related risk management framework. Steven will discuss the issues around IT related risks, which standards and frameworks address this risk, which elements are still lacking, and how the new framework will address these issues.

Steven Babb is a senior manager in KPMG's IT Advisory practice and works in their risk and compliance team. He has worked in the IT industry for over 20 years and has been working with KPMG since 1996. He is the global account manager on a telecoms client, as well as having a number of internal audit external audit responsibilities. In addition to his client facing responsibilities, he leads on IT risk management activity across the UK. He has worked with ISACA on the development of their RiskIT framework and is now working with them further; Steven sits on their Framework committee, which is responsible for overseeing the on-going development of ISACA's frameworks

The CISA/CISM CPE credit for this meeting will be 1 hour.
